

Piece By Piece: Neurobehavioral Services

Postdoctoral Fellowship in Clinical Psychology

Program & Training Director: Anthony Tucci, Ph.D.

Application Deadline: Friday, March 3, 2023

APPCN Member Program: No

Start Date: August/September 2023

Introduction

Piece by Piece: Neurobehavioral Services is offering a full-time postdoctoral fellowship in clinical psychology. We are currently recruiting for a postdoctoral fellow for the 2023-2024 training period. The application deadline is Friday, March 3, 2023. Interviews will be held via video (e.g., Zoom, Skype, Google Meet). Early applications are encouraged.

Early applications are encouraged and will be ongoing until the positions are filled.

Training Setting

Piece by Piece: Neurobehavioral Services is an outpatient clinic located in Oak Brook, IL. The principal components of the fellowship include psychotherapy services (90%). Psychological/neuropsychological assessment services may also be provided, though will only be available for the right candidate. Teaching and professional development will also be part of the fellowship (10%). Research opportunities are available, though not a focus of the training year. Caseload ranges between 15-25. Office days are Monday through Friday typically from 8am-5pm. As part of the clinic's attempt to reduce exposure to COVID-19, opportunities for telehealth services (e.g., clinical interviews and counseling sessions) are available.

Patient Population

We primarily conduct outpatient neuropsychological assessment of children/adolescents, adults, and older adults with neurodevelopmental, neurological, neuropsychiatric, and complex medical disorders. Referrals come from varying disciplines in the areas, including neurologists, primary care physicians, psychiatrists, therapists, rehabilitation centers, and schools. Presenting concerns include neurodevelopmental disorders (ID, ADHD, learning disabilities, autism), brain injury, neurologic disorders, autoimmune and infectious disorders, dementias, cerebrovascular disease, and psychiatric comorbidity.

Supervision

Fellows work with their supervisor weekly. Training is individualized and developmental, and is designed to prepare fellows for independent practice. Depending on the level of experience with various patient populations, fellows initially observe or co-interview with their supervisor. As fellows progress within the year, supervision may become less structured and more similar to

Fellowship in Clinical Neuropsychology:

consultation. Fellows may have the opportunity to provide training and tiered supervision to psychology practicum students completing a rotation in our clinic.

Didactics and Education

Didactic meetings take place on a bi-weekly basis. These meetings are designed to cover topics to assist fellows in advancing their clinical practice of neuropsychology and prepare them for board certification. Didactics include: webinars, fact-finding cases, discussion of articles, as well as presentations from clinical supervisors on various topics in neuropsychology. Fellows will also be required to present on topics of interest throughout the years. Didactic topics include basic neuroscience, clinical neurology, functional neuroanatomy, neuropathology, clinical neuropsychological and psychological assessment, intervention, psychopathology, psychopharmacology, and the role of allied health services in promoting cognitive health. Stipends for conference attendance and licensing preparation may be made available, based upon individual needs and approval by the practice.

Benefits

Annual compensation is between \$40,000 to \$60,000+, based upon a percentage of reimbursement. Benefits include 10 paid time off days and 7 paid holidays. Health insurance is available, with the clinic paying a portion of the employee premium.

Commitment to Inclusion and Diversity

Piece by Piece: Neurobehavioral Services is committed to promoting diversity and tolerance within its staff by building a culture of inclusion and respect. Our goal is to ensure that all fellows, no matter their race, sexuality, country of origin, gender, religion or able-bodiedness, feel included at Piece by Piece: Neurobehavioral Services.

Eligibility Requirements

Qualified applicants will have completed an APA- or CPA-accredited doctoral training program in clinical psychology and APA- or CPA-accredited internship in clinical psychology. The candidate's doctoral degree must be conferred prior to their fellowship start date.

To Apply

Applications must be received electronically or postmarked by Friday, March 3, 2023. Application materials may be emailed (preferred) or sent by mail.

Materials to submit:

- Cover letter/letter of interest
- 3 letters of recommendation
- Curriculum vitae
